The Futurity should be a Regional event, sponsored by members from various clubs in the region. Dates and grounds should be selected by consulting with the clubs in the region where the Futurity is to be held in order to avoid conflicts. The trial should be held during the week, just before or after a regional trial if possible. The dates will have to be approved by the Futurity Committee and by the Regional Dates Coordinator.

Ideally the grounds should be adequate for continuous courses, enough native birds should be available to allow for the proper running of continuous courses. Native bird population may be supplemented with released birds so as to insure birds on every course, in as natural a condition as possible.
