

# The Saint Bernard Club of America's Weight Pull Statistical Standings System

In doing the Statistics in Weight Pulling through out the year, I tried to report accomplishments that I thought would be of interest to those that do Weight Pulling and those who just love to watch it. The regulations state in Chapter 13, "For statistical purposes, records shall be kept on the basis of a weight pull year. The weight pull year shall run from January 1 to December 31 of each calendar year." The regulations also state in Chapter 4, "Wheeled events will be kept separate from snow events in point standings."

The first item that I thought would be of interest is the Highest Weight Pulled. This is very easy for people to understand. This record is the highest pull during the year for that particular dog. Due to space limitations I only post the top ten pulls. There are many more dogs pulling during the year who are not in the top ten.

The second record is Highest Percentage or Highest Weight Pulled Pound for Pound. This accomplishment is achieved by dividing the dogs weight into the amount pulled. Again, only the top ten placements are reported.

The Point Standings are earned during the pull and is computed by the dog's placement and number of dogs defeated. The top five pulls for the year are added up to determine the points and the dog's placement. In order for a dog to be eligible and counted for points, he must pull at least the starting weight of 500 lbs. or a round above that weight. Each dog will receive one point per dog defeated in his class. In addition, five points will be awarded for first place, four points for second place, three points for third place, and two points for fourth place in each class.

I hope this clarifies the Statistics.

**Vicki Graves,  
Weight Pull Secretary**
