

## CONFORMATION VERSATILITY TEST REQUIREMENTS

Vizslas must be at least six months of age to participate in this test. Altered dogs are eligible.

Judges are not to determine whether the Vizsla is of championship caliber but it should be an overall good representative of the breed and must reflect the qualities of a purebred Vizsla.

Vizslas taking this test must conform to the current Vizsla Standard and shall be measured each time they are judged to assure that they are within the height requirements for the breed. An AKC wicket must be used and score sheets marked accordingly.

Vizslas taking this Test must score at least fifty percent (50%) in each category and have an overall score of 60 points out of a possible 100 points.

1. HEIGHT	20 POINTS
2. TEMPERAMENT	20 POINTS
3. GENERAL APPEARANCE	20 POINTS
4. HEAD AND NECK	20 POINTS
5. RUNNING GEAR	20 POINTS

Should the Vizsla have a serious, but not disqualifying fault, the judge may at his/her discretion score the dog less than the required 50% in that category thereby failing a dog that is not a good overall representative of the breed.

Measurements taken before age 24 months will not qualify for a Conformation Certificate but must be totaled in the overall score. Passes between 6 and 24 months will count but **the Vizsla must be measured once at 24 months or older**. Champions of record or other Vizslas that qualify for a Certificate need be measured only once but must be at least 24 months. (Revised November 2006)
